We would like to offer you a stylish and reasonable presentation that will help you to promote your business.

Sustainable Food Systems for FOOD SECURITY
Caribbean’s problem with food security

- 80% of all food is imported
- Food import bill ~ 8 to 10 B USD
- Over reliance on food imports
- Foreign exchange loss
- Food supply chain disruptions
- Drought conditions
What do we have to do?

- Food security, food
- Sovereignty and access to good nutrition
- Locally sourced fruits,
- Vegetables,
- Protein
- Regular food supply to vulnerable groups
CALL for ACTION

• a nature-based economic recovery programme

• strengthen food security and increase people’s livelihood options.

• easy-to-implement strategies (“low hanging fruit”)
Our solutions

Components

- Nature-based projects for food security and sustainable livelihoods
- Knowledge, learning and awareness

Outputs

- NCTFs support community-based projects on permaculture, apiculture, sea moss cultivation and sustainable tourism
- NCTFs support local organizations to build capacities
- Results are shared regionally promoting exchange and raising awareness

Outcomes

- Communities are engaged in sustainable livelihoods and improve food security
- Local organizations are strengthened and able to raise additional support

Goal

- Nature-based activities contribute to the Caribbean economies recovery after COVID-19
